

Screen printing, UV based, repositionable adhesive. It is possible to print a full background or a partial artwork. It activates at room temperature.

Key features:

- Removable and repositionable
- It does not leave any adhesive traces
- If bonded with absorbing substrates, it becomes permanent
- Suitable to print paper, coated paper, PVC, PMMA, PET, PETG boards, polycarbonate and polyester
- Compliant with EN71/3, 2019-2021 release

Instructions for use:

UV STICK is ready for use. It is recommended to mix it thoroughly before use.

Screens:

Wide range of screens: 55-100 th/cm.

Drying and Curing:

Its good reactivity allows curing at a 15-20 m/min. speed by means of 80-120 W/cm lamp.

NOTE:

It is recommended to carry out a test suitable to determine the right quantity of UV STICK necessary to obtain the final effect.
It is also recommended to bond the printed board to the final substrate in order to evaluate the tear strength necessary to detach the two parts

Cleaning:

Once printed and cured, the adhesive is washable with water and soap and still maintain the adhesive power.

Clean tools and screens with washing solvents 109 and 114 (see TDS)

Stacking:

Before stacking protect the printed substrate with a coated paper sheet

Products range:**UV STRONG ADHESIVE (Cod.206088)**

It is a version with higher permanent, adhesion power.

It can be mixed with UV STICK

Storage and shelf-life:

Protect from extreme temperature and from direct sunlight.

It is recommended to keep the original closed container in a fresh, dry and dark place.

Shelf life: 12 months

Packing:

Black plastic containers: 1 e 5 KG

Larger packings available upon request
